MDA awarded 29 new research and development grants totaling more than $7 million with broad applicability across the diseases in MDA’s program.

23 research grants made to established investigators

6 development grants made to young researchers on the brink of becoming independent investigators

$180,000 Average development grant award

$300,000 Average research grant award

MDA now committed to about 150 research projects around the world

The world’s leading neuromuscular disease clinicians and scientists serve on MDA’s Research Advisory Committee and recommend the top science projects for approval by MDA’s Board of Directors.

MDA takes a big-picture perspective across neuromuscular diseases to uncover breakthroughs that will accelerate treatments and cures. The power in this research approach is that knowledge and information from one disease can often yield progress in others to speed urgently needed answers for families.
